

All Natural Leaf Cleaner

WASH ME!

Natural Leaf Cleaner ----- Directions for Use

How Do I apply WASH ME! to the leaves?

- WASH ME! is ready to use and should not be diluted.
- Spray directly on leaves and wipe off with a clean paper towel and be sure to always use a new paper towel between plants so as not to share material from one plant to the next
- Another effective way is to spray or pour the liquid directly on the paper towel and then apply

After applying and wiping off the leaf, what's next?

- After cleaning the leaf, we suggest a rinse or misting with fresh water which then can be wiped off
- The product can be stored for next use in the container it came in, and for a week or two it is fine to leave it in the 360 spray bottle (comes with the Kit). The nozzle of the 360 spray bottle can be rotated to the closed position for storage.
- After the spray bottle has been emptied, we recommend rinsing with fresh clean water and spraying a few times to remove any fluid from the spray head.

How often can WASH ME! be used?

- Use WASH ME! whenever dust or dirt builds up on the leaves to restore them to a clean and healthy state.
- Rinsing the leaves with fresh clear water after cleaning is the best practice.

Ingredients in WASH ME! (all natural organic)

- Pure RO (reverse osmosis) water, organic finest castile soap, pinch of citric acid (like lemons and oranges contain)
